

Amendments to the Abstract

Please **replace** the Abstract as currently set out on page 11 with the following amended Abstract.

-- The invention relates to an antenna system comprising a first type of antenna ~~(10)~~ and second and third antennas ~~(11,12)~~ of a second type. The first to third antennas ~~(10-12)~~ are slots which are excited by longitudinal radiation and are placed on the same edge of the same substrate. The first antenna ~~(10)~~ is placed between the second and third antennas ~~(11,12)~~. This system is particularly suitable for integration in a PCMCIA card. --
